

METHOD OF APPLICATION

Ensure a 24-hour time interval for grouting after tile fixing

The joints must be dry, clean, free of dust, debris, paints & adhesive

Take water into a clean mixing pail

Add JSW Tylfix Grout and mix thoroughly by hand or with a slow-speed mixer (50-100 RPM)

Ensure achieving a uniform color & lump-free consistency

Allow the mix to stabilize for 2-5 minutes and then remix

Use the paste within 45-60 minutes from mixing

Ensure that the joint is filled completely, and the grout is not just sitting on top

After grouting, clean and polish tiles with a damp sponge or cloth

To remove hard stains, use Tylfix Cleaner

TYLFIX GROUT- Cementitious
Shade Card

Substrate Preparation

- Ensure a 24-hour time interval for grouting after tile fixing
- The joints must be dry, clean, and free of dust and adhesive
- Emptied at least 2/3 of the tile thickness depth
- Before grouting, ensure that the installation adhesive has set and released most of its moisture.
- The joints should not be wet during work
- Put masking tape beside the grouting space or use a sealer if necessary

Mixing

- Take water into a clean mixing pail
- Add JSW Tylfix grout and mix thoroughly by hand or with a slow-speed mixer (50-100 RPM)
- Avoid entraining air by mixing at a very high speed or by over-mixing
- Ensure that a uniform color and lumps-free consistency is achieved
- Allow the mix to slake for 2-5 minutes and then remix
- Use the paste within 45-60 minutes from mixing

Application

- Using a hard rubber squeeze/grout float, press the grout firmly into the joints
- Hold the float at a 90° angle and pull it at a 45° angle diagonally across the joints and tile to avoid pulling out the material
- Work in small areas to have better control in removing excess grout from joints and the surface by moving the squeeze diagonally to the grout lines
- Ensure that the joint is filled completely, and the grout is not just sitting on top

PRODUCT DESCRIPTION

TYLFIX GROUT- Cementitious complies with the C62W requirements as specified in "BS EN 13888:2009 - Requirements, evaluation of conformity, classification, and designation of grouts for tiles", as well as "ISO 13007- Part 3: Terms, definitions, and specifications for grouts."

FEATURES & BENEFITS

- **Easy to use & Clean:** just mix with water, ready to use
- **Polymer modified:** crack-free, minimum shrinkage & water resistance
- **Suitable for varied tile and stones:** All ceramics, vitrified tiles, granites, etc.
- **Low VOC:** For healthy living.
